

# Biosfeen™

## FUNCTIONAL LIPIDS

**Biosfeen™** is a range of functional lipids researched and developed by **Bioiberica** which have shown promising efficacy data in different therapeutic areas:

### COGNITIVE HEALTH

ALZHEIMER DISEASE (AD)

Neuroprotective effect, slowing down the progression of AD.  
Undergoing human clinical trials with AD patients.

### DERMAL HEALTH

PSORIASIS AND ATOPIC DERMATITIS

**AQUASORB®** contains **Biosfeen®** functional lipids and **CS b-Bioactive®** chondroitin sulfate, ingredients that have proven their clinical efficacy recovering and maintaining the skin's balance with psoriasis and atopic dermatitis.

### METABOLIC HEALTH

NON-ALCOHOLIC FAT LIVER DISEASE (NAFLD)

Fatty liver disease and risk factors for metabolic syndrome.  
Undergoing human clinical trials with patients with NAFLD.

## ABOUT BIOIBERICA

**Bioiberica** is a **biotechnological company** specialized in the identification and isolation of **biomolecules** with significant biological and therapeutic properties, extracted from animal tissue.

The company is **vertically integrated** from the origin of the active ingredient to the finish product and patient.

**Bioiberica** focus its activities in the research, development and manufacturing of **Glycosaminoglycans** (Heparin, Chondroitin, Hyaluronic Acid and Glucosamine) and **Functional Lipids**.

It is a worldwide reference for the production of heparin (1 in 5 doses of heparin is by **Bioiberica**) and chondroitin sulfate (16 million patients treated worldwide).

**Bioiberica's** innovation strategy is based on continuously developing new biological compounds that may be able to be applied in science.
